## **Grey House Publishing announces the 2015 Edition of the *Comparative Guide to American Hospitals***

This new 2015 edition compares all of the nation's hospitals by 47 measures of quality in the treatment of heart attack, heart failure, pneumonia, surgical procedures, pregnancy care and, new to this edition, children's asthma care, medical imaging and patient satisfaction.

*The Comparative Guide to American Hospitals* provides a snapshot profile of each of the nation's 4,300+ hospitals. These informative profiles illustrate how the hospital rates when providing 47 different treatments (26 are new to this edition) within seven broad categories:

- Heart Attack Care
- Heart Failure Care
- Pneumonia Care
- Surgical Infection Prevention
- Pregnancy Care measures
- Children's Asthma Care (NEW)
- Use of Medical Imaging (NEW)
- Survey of Patient's Hospital Experience (NEW)

Each profile includes the raw percentage for that hospital, the state average, the US average and data on the top hospital. For easy access to contact information, each profile includes the hospital's address, phone and fax numbers, email and web addresses, type and accreditation along with 5 top key administrators. These profiles will allow the user to quickly identify the quality of the hospital and have the necessary information at their fingertips to make contact with that hospital.

Plus, regional volumes make locating information about hospitals in your area quicker and easier than ever before.
