Grey House Publishing announces the Summer 2013 Edition of *Weiss Ratings' Guide to Credit Unions*

Grey House Publishing is proud to announce the publication of the Summer 2013 Edition of *Weiss Ratings' Guide to Credit Unions*.

Grey House's new Financial Ratings Series combines the strength of Weiss Ratings and TheStreet Ratings to offer the library community with a single source for financial strength ratings and financial planning tools covering Banks, Credit Unions, Insurers, Mutual Funds and Stocks. The financial strength ratings from Weiss Ratings & TheStreet Ratings provide accurate, independent information that library patrons need to make informed decisions about their financial planning.

All of Weiss Ratings' Guides are published quarterly, utilize an easy-to-use, A-F rating system (similar to school grading systems), and contain more comprehensive and up-to-date ratings than any of their competitors. This Summer 2013 edition of *Weiss Ratings' Guide to Credit Unions* features ratings and analysis on over 9,000 Credit Unions in the U.S.

Weiss Ratings' Guide to Credit Unions is divided into three sections, in addition to an introductory section and a thorough Appendix. Inside the front cover of the book are definitions of each letter grade, this explanation is useful for quick-reference as the user is researching companies in the Guide.

The introductory section begins by welcoming the user and laying out the mission statement. Then follows a "How To Use This Guide" orientation to the book. The final components of this section are an explanation of the Financial Strength Ratings used in the book and a page of important warnings and cautions for the user to take into account when evaluating Credit Unions.

Section I is an **Index of Credit Unions**. This section contains Financial Strength Ratings, Key Rating Factors, and summary financial data for all U.S. federally-insured credit unions. Companies are sorted in alphabetical order, first by company name, then by city and state.

Section II contains **Recommended Company List**. This is a list of companies receiving a Financial Strength Rating of A+, A, A-, or B+. Recommended institutions are listed in each state in which they currently operate one or more branches, and then organized alphabetically by city. If a company is not on the list, it should not be automatically assumed that the firm is weak. Indeed, there are many firms that have not achieved a B+ or better rating but are in good condition with adequate resources to weather an average recession.

Section III is a list of **Rating Upgrades and Downgrades** which identifies those institutions receiving a rating change since the previous edition of this publication, whether it is a rating upgrade, rating downgrade, newly-rated company or the withdrawal of a rating. Ratings are normally updated once each quarter of the year. Each listing contains: The Institutions Name, New Financial Strength Rating, State and the Date of Change.

Weiss Ratings' Guide to Credit Unions ends with an Appendix containing three sections: Recent Bank and Thrift Failures, How do Banks and Credit Unions Differ and a Glossary which contains the most important terms used throughout the publication.

Most people assume their credit union will survive, year after year. However, prudent consumers and professionals realize that in this world of shifting risks, the solvency of financial institutions can't be taken for granted. *Weiss Ratings' Guide to Credit Unions* offers the most comprehensive, accurate, and independent analyses and ratings of U.S. credit unions, all presented in an accessible format so that users at any level can easily navigate through the analyses.
