**Grey House Publishing announces the Seventh Edition of the
*Older Americans Information Directory***

Winner of the 2007 National Mature Media Award
Presented by the Mature Market Resource Center

Winner of the 2007 National Health Information Award
Presented by the Health Information Resource Center

Grey House Publishing is proud to announce the publication of the Seventh Edition of the Older Americans Information Directory.

This seventh edition of *Older Americans Information Directory* could not be more timely. Questions that are currently on the minds of all Americans – especially those pertaining to the economy and health care, are on the minds of older Americans with a concern that intensifies each day. How to find and pay for needed support services? How to deal with health issues? How to be effective self-advocates? How to understand changing legal situations? How to manage financial issues? How to find ways to keep your mind and body active and involved?

This comprehensive reference work answers these questions and more for the 37.3 million older Americans that the U.S. Census recorded in 2006. It will continue to provide answers for the 40 million seniors projected in 2010 (15% increase) and the 55 million seniors projected in 2020 (36% increase). This generation of older Americans is living longer, staying healthier, and getting smarter, than their counterparts of just 20 years ago. *Older Americans Information Directory* is designed to help this growing population find the resources they need to continue leading long, happy, healthy and productive lives.

-continued-

Grey House Publishing Announces the Seventh Edition of the *Older Americans Information Directory*

Following this Introduction are 11 valuable articles, reprinted from the National Institute on Aging. They are written in easy to understand language, on topics relevant to a majority of aging Americans, from *Aging and Your Eyes* to *Mourning the Death of a Spouse*. In addition, you'll find two articles from ElderLaw on *Medicare* and *Home Health Care*. See the Table of Contents for the complete list.

All the listings in the Directory are thoughtfully organized into 12 major chapters, including *Organizations, Agencies, Awards, Continuing Education, Disability Aids, Health Conditions, Living Facilities, Legal Resources, Libraries* and *Print Resources*. Each listing includes current contact information, key personnel, and helpful descriptions.

This edition also includes two helpful appendices. The first is a *Glossary of Health & Medical Terms*, with 65 terms that define language found throughout this and other publications, as well as terms used by professionals in the field. The second is a *Glossary of Legal Terms*, that includes 22 in-depth definitions designed to demystify terms used by lawyers and others regarding legal situations that many older Americans are likely to find themselves in.

Three indexes offer additional ways to access this Directory's content. The *Entry Index* is an alphabetical list of all entries herein. The *Geographic Index* lists all Agencies, Associations, Facilities, and Organizations by state. The *Subject Index* organizes all listings by more than 100 categories, from Elder Abuse to Wills.

For the fastest access to information, the *Older Americans Information Directory* is also available as an Online Database. Subscribers to the Online Database will have immediate access to the detailed listings contained in the print directory. With the *Older Americans Information Directory* Online Database, users will be able to conduct in-depth searches of the database to locate resources that meet specific search criteria, and all listings are accompanied by links to the listee's web sites and email addresses. Finding specific information and resources for those living with disabilities has never been easier. Visit www.greyhouse.com for a free search through the Online Database or call (800) 562-2139 x.118 for more information.

This title is a vital resource for any public, academic, or special library serving a senior population and for libraries supporting health sciences programs. Recommended for those working with the elderly, as well as upper-level undergraduates, graduate students, professionals/practitioners and general readers.
