This new edition provides updated and enhanced data on all populated communities and counties in the state of New York. Users will find four major sections that cover everything from Education to Ethnic Backgrounds to Climate. All sections include Comparative Statistics or Rankings. New to this edition is an updated About New York section at the front of the book, comprised of detailed narrative and colorful photos and maps.

About New York

This 4-color section gives the reader a real sense of the state and its history. It includes a Photo Gallery, and comprehensive sections on New York's Government, Land and Natural Resources, and Demographics. Filled with charts and maps, these 29 pages help to anchor the researcher to the state, both physically and politically.

Section One, **Profiles**, is organized by county and gives detailed profiles of more than 2,500 places that make up New York State including counties, cities, towns, and villages. The data is based on

the 2010 Census, with additional data from 2011 and 2012. Major fields of information include Geography, Housing, Education, Religion, Ancestry, Transportation, Population, Climate, Economy, Industry, and Health.

Section two, **Education**, begins with an Educational State Profile, summarizing the number of schools, students, diplomas granted and educational dollars spent. Following this profile are School District Rankings on 16 topics ranging from Teacher/Student Ratios to High School Drop-out Rates. Following these rankings is the statewide National Assessment of Educational Progress (NAEP) results and data from the New York State Report Card, which gives an overview of student performance.

Ancestry and Ethnicity is the third section that provides a detailed look at the ancestral, Hispanic and racial makeup of New York. The 200+ ethnic categories are ranked in 3 ways: First by number, based on all places regardless of population; Second, by percent, based on all places regardless of population; and Third also by percent, but based on places with populations of 50,000 or more.

The fourth and final section, **Climate**, is explored in detail, and includes a State Summary, a map of the state's weather stations, and profiles of both National and Cooperative Weather Stations. In addition you'll find Weather Station Rankings and current and historical Storm Events. These tables rank the most destructive weather events by both fatalities and property damage over the past 25 years.

There is no better or more all-encompassing reference on the State of New York than *Profiles of New York*. This highly informative and detailed reference has proven to be an extremely useful resource for those in business, politics and education throughout the Empire State and beyond.
