Grey House Publishing Announces the First Edition of the *Allergies Handbook & Resource Guide*

Grey House is pleased to add the *Allergies Handbook & Resource Guide* to its award-winning *Health & Wellness* series. This new title is designed to bring together necessary and valuable information about allergies and related conditions and disorders that both contribute to and result from allergies. Readers will gain valuable insight through easy-to-understand, educational information.

Studies & Statistics
This section is nearly 400 pages and includes detailed reports, journal articles, fact sheets, and infographics from sources including the U.S. Food and Drug Administration, Centers for Disease Control and Prevention, National Institutes of Health, U.S. Department of Health and Human Services, peer-reviewed journals, and more.

It begins with an annotated table of contents, followed by guidelines for the diagnosis and prevention of allergies, information on food allergy concerns in schools, the increasing effects of climate change on human health, statistical reports on diagnosed allergies in the U.S., and more informative resources for people experiencing the complications of allergies.

Helpful fact sheets, reports, and journal articles follow, covering related conditions and disorders including arthritis, asthma, celiac disease, chronic fatigue syndrome, diabetes mellitus, nasal conditions, skin disorders and more.

Allergies Resources:
This section has a wide variety of resources for those with allergic conditions, including agencies and associations, foundations, libraries and resource centers, support groups and hotlines, research centers, print resources, digital resources, and web sites.

Related Conditions & Disorders:
This section includes details on 20 conditions and disorders relevant to allergies. Overviews written by Marianne Moss Madsen detail the conditions themselves, how they apply to allergies, and preventative and treatment options.

Additional sections include:

- **Glossary of Terms** lists major terms and concepts related to allergies
- **Entry Index** lists all directory entries alphabetically.
- **Geographic Index** organizes listings alphabetically by state.
