**Grey House Publishing Announces the Spring 2019 Edition of
*Weiss Ratings' Investment Research Guide to Stock Mutual Funds***

Grey House Publishing is proud to announce the publication of the Spring 2019 Edition of *Weiss Ratings' Investment Research Guide to Stock Mutual Funds*. Published four times per year, *Weiss Ratings' Investment Research Guide to Stock Mutual Funds*' purpose is to provide accurate, unbiased ratings and data to help citizens across the U.S. choose the most profitable stock mutual funds at the most efficacious times. Each guide provides a number of ways to locate data on over 20,000 stock mutual funds.

Weiss Ratings' realizes that past performance is an important factor to consider when making the decision to purchase shares in a mutual fund. The ratings and analyses in this *Investment Research Guide* can make that evaluation easier when considering stock mutual funds. The rating for a particular fund indicates Weiss Ratings' opinion regarding that fund's past risk-adjustment performance.

With investing such a complex subject and the enormous popularity of mutual funds as a simple way to enter the markets it is no surprise that consumers need assistance. It is a complex subject and consumers want unbiased, independent guidance in helping them find a path to investing that is focused on their needs.

The *Investment Research Guide to Stock Mutual Funds* is divided into seven main sections, preceded by an introductory section and followed by a thorough Appendix. Weiss' complete letter-grade rubric is detailed within the introduction as an easily accessible reference for users researching companies in this *Investment Research Guide*.

The introduction welcomes the user, lays out Weiss Ratings' mission statement, and presents a "**How To Use This Guide**" orientation to the book. The **Financial Strength Ratings** are explained in the book and a page of important **warnings and cautions** for the user to take into account when evaluating stock mutual funds.

Weiss Ratings are fundamentally incomparable to nearly all the other ratings available in America today. While other rating agencies focus mostly on larger companies that can afford to pay them large fees, Weiss Ratings covers all companies, large or small, as long as they report sufficient data for us to analyze. This allows us to provide far broader coverage including nearly all U.S.- traded stocks, ETFs and mutual funds plus nearly all U.S. banks, credit unions and insurance companies.
