Grey House Publishing Announces the 2019/2020 Edition of *The Complete Resource Guide for Pediatric Disorders*

The Complete Resource Guide for Pediatric Disorders, 2019/20 provides current, understandable medical information, resources and support services for 213 pediatric disorders. A repeat winner of the National Health Information Awards “Honoring the Nation’s Best Consumer Health Information Programs and Materials” award, this reference work provides vital information for afflicted children and their support network, including family, friends, and medical professionals. This reference work includes 8,843 listings, and each listing has updated contact data – address, phone, fax, web site, e-mail – and helpful descriptions. Users will find 6,344 fax numbers, 6,035 e-mail addresses, 7,910 web sites and 14,625 key executives – many more data points than the last edition.

The disorders and issues covered in this directory have been determined to be most prevalent in the pediatric population, ages 0-18. They include both physical and mental conditions, and range from cancer to nightmares.

The front matter for *The Complete Resource Guide for Pediatric Disorders* includes:

- **A Brand New Article** entitled, “Modest Increase in Kids’ Physical Activity Could Avert Billions in Medical and Other Costs”
- **Two Glossaries.** The first is a guide to medical terminology that provides important navigational tips and more than 200 commonly used medical prefixes, roots and suffixes to help readers decipher terms they may encounter in the disorder descriptions or in other resources they are using. The second glossary includes medical acronyms, especially as they relate to vaccines.
- **Guidelines for Obtaining Additional Information and Research.** These guidelines assist parents and caregivers who are interested in obtaining more information on such diverse topics as physicians who specialize in certain pediatric disorders, accredited hospitals, approved drugs or medical devices for certain pediatric conditions, or current clinical trials that are investigating possible new therapies for particular diseases.
- A valuable list of **Disorders by Biologic System.**

This directory is a one-stop resource, enabling professionals and the families they serve to obtain immediate, important information from one comprehensive source. It is organized into six detailed sections.
