

How To Use **MEDICAL AND HEALTH CARE BOOKS AND SERIALS IN PRINT™**

BOOK INDEXES

GENERAL EDITORIAL POLICIES

In order to ensure that the essential information in these listings is uniform, complete, and easy to find, the following editorial policies have been maintained:

Every effort is made by most contributing publishers to prepare their material with consideration for its accuracy throughout the life of this edition of *Medical and Health Care Books and Serials In Print™*. Most publishers anticipate price changes when they revise their material, list forthcoming books even if publication dates and prices are not set, and for the most part, try not to list books that may shortly become unavailable before the new edition is published. All prices are subject to change without notice. Most prices are retail prices. Lack of uniformity in the individual catalogs prohibits indicating trade discounts. However, all publishers do not uniformly supply this information, and Bowker can only make its best efforts to transmit this information when it is provided.

Bolded ISBNs have been newly added to our database since the publication of *Medical and Health Care Books and Serials In Print™ 2019*.

ALPHABETICAL ARRANGEMENT OF ENTRIES

Each entry is filed alphabetically by word, with the following exceptions:

Initial articles in English, French, German, Italian, and Spanish are deleted from both author and title entries.

Proper names beginning with Mc and Mac are filed in strict alphabetical order. For example, entries for contributors' names such as MacAdam, MacAvory,

MacCarthy, MacDonald, and MacLean are located prior to the pages with entries for names such as McAdams, McCarthy, McCoy, and McDermott.

In the Books - Author Index, compound names are listed under the first part of the name and cross-references appear under the last part of the name.

Entries beginning with initial letters (whether authors' given names or titles) are filed first: Smith, H.C. comes before Smith, Harold A.; IB. Priestley: The Man and His Ideas, comes before Jade.

INFORMATION INCLUDED IN ENTRIES

Entries include the following bibliographic information, when available: author, co-author, editor, co-editor, translator, title, number of volumes, edition, series information, whether or not illustrated, number of pages, year of publication, price with type of binding if other than cloth over boards, publisher's order number, International Standard Book Number, and publisher's name. (Information on the International Standard Book Numbering System in the United States and other English-speaking countries is available from R.R. Bowker. See page viii.)

The Author Index has been revised to reflect exclusively title, subtitle, volume number, and the publisher's abbreviated name. The last piece of information is a page cross-reference number to the full bibliographic entry in the Title Index.

If more than two authors are responsible for a certain publication, only the name of the first is given followed by et al.
