“Weiss Ratings has created this volume in its Financial Ratings Series in order to provide readers with a **solid analytical tool** for use in selecting and monitoring their credit union. It employs **an objective, easy-to-follow ratings system** marked by an A-F grading scale (A “U” rating denotes that the listed institution is unrated) and provides users with nine steps of clear instruction on how to best approach and use its information. This guide would be **highly useful to consumers or professionals seeking bread-based financial institution information.**”
